ULTIMA

Screwless Decorative  
Wiring Accessories Range

## Introducing

The Ultima Screwless Range

**Niglon's flagship range, manufactured with stainless steel faceplates, in a luxurious brushed or polished chrome effect finish.**

The screwless faceplate gives this flagship range a modern, clean design, whilst also making installation a quick and simple job every time. Thanks to a large selection of features the Ultima switch and sockets are perfect for use in a wide range of settings from residential to hotels and commercial buildings.

Now read about all the features that help make this range the best of the best.

### Metal to Metal Rockers

No visible plastic switch surrounds, creating a sleek and lavish look to each faceplate.

### Coloured Inserts

Three subtle insert colours; black, white and grey are available in this range, designed to sit neatly alongside the brushed and polished chrome finish of the faceplates, guaranteed to compliment any style of interior.

### USBs

Smart USB socket outlets are able to detect USB devices when plugged in and adjusts charging current, turn to standby when device is fully charged and have the ability to protect the devices in the event of an overload.

### LEDs

Where applicable flush red neon LED indicators have been fitted, giving a clean sophisticated look to the range. The use of neon LEDs is unobtrusive in daylight and produces a soft glow in the dark.

### Modular Switches

All 10AX light switches are constructed using a highly adaptable modular design, allowing reconfiguration on site, without the need for a full grid system.

### Edge to Edge Gasket

Concealed edge to edge gasket to prevent tarnishing of the plate where moisture is present during installation, such as on freshly plastered or painted walls.

## Part Numbers

Made Simple

Each product in the Ultima range is available in both brushed (-BC) and polished chrome (-PC) and where available with black\*, white (W) or grey (G) inserts.

When ordering individual items make sure to add on the correct finish and insert colour codes to guarantee you receive the desired product.

The example below shows the code for **U-S132DPS-BCG** a two gang socket outlet in brushed chrome with grey inserts.

\*If the insert is black no colour code is required.

# 10AX Light Switches
