- Material - 304 stainless steel, folded and welded
- Construction - 4 piece assembly

Automatic Transfer Switches

Automatic Transfer Switches are the ideal solution for transferring power from the Mains to a Standby or between a Mains to Mains supply.

The range includes 4 Pole and 2 Pole units (2 Pole up to 125A), available in mild steel or GRP enclosures. Four door mounted status indication lights and a Mains Failure Override, key switch as standard.

See pages 55-56 for details
