- Finish - Galvanised
- Thickness - 1.2mm

# BESPOKE SERVICE

Using comprehensive workshop facilities, customisation of our range of enclosures is quick and easy. With highly accurate laser cutting technology any number and size of hole can be formed leaving a clean edge every time. Should you wish, it is possible to cut not only the door, but any side of the enclosure.

- Laser engraving can produce any legend plate or label in a size to suit the information
- Shrouding cut and engraved as required
- Switches can be mounted to suit cabling
- Full or part glazing can quickly be installed
- Work can be carried out on mild steel, stainless steel and GRP enclosures

Contact our sales team for more information or to place a custom order
