

INTRODUCING

niGLONTM

For All Your Electrical Essentials

niGLON

The Total Package

We are a fourth-generation family run and owned company which has been supplying electrical products across the UK for the past eight decades. Alongside our wealth of experience which has seen us establish a sterling reputation as a trusted supplier, we are fuelled by a desire to constantly innovate and improve our product ranges and customer service.

Based in the Midlands, our purpose built distribution facility is located just 1 mile from Jct 4 of the M42.

We have also committed ourselves to highlighting the need for better safety standards across the industry; and practise what we preach by proudly displaying certification accreditations on our website and within our product brochures.

We have thousands of products across our circuit protection, wiring accessories, cable management and our other ranges - and our safety-first approach continues to lead the way, ensuring quality products when you need them.

We know that stock availability is core for you, which is why we've invested millions of pounds into research and development, and new ways of working which ensure a smoother customer journey and vastly improved stock availability - with more than 4,000 stocked products.

ULTIMA[★]

Installed in homes, hotels and commercial buildings around the world. Ultima's screwless plate design is Niglon's flagship range.

PREMIUM EDGE S

Contemporary, low-profile, stainless steel plate with a luxurious and sophisticated brushed chrome effect finish.

PREMIUM EDGE

Manufactured with stainless steel faceplates available in brushed or polished chrome finishes and white or black inserts.

MEDIAN

The complete solution for all jobs: clean, simple, and designed to complement all interiors.

PROFILE

A modern range of slim-profiled white moulded wiring accessories, perfect for residential or commercial use.

Wiring Accessories

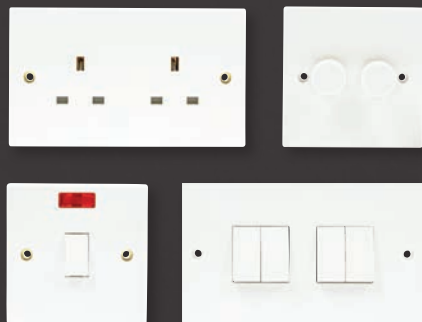

Niglon's ethos has always been centred around offering customer choice without any reduction in quality. There are now more than 850 products available across ten ranges of switches and sockets - and more than £2.5million has been invested into research and development tooling and manufacturing capabilities to ensure every single one is safe and high-performing.

The ranges cater for a vast array of differing installations, aesthetic tastes and budgets, whether you are seeking a sleek and contemporary product or a heavy-duty accessory designed to withstand the harshest of environments.

**ARCTIC
EDGE**

Bright white moulded, square-edge range offering traditional design values for new or existing installations.

**EURO
MEDIA**

Developed to enable quick and easy bespoke configurations, allowing integration of television, data and USB charging points.

MATRIX20

A comprehensive grid range offering easy on-site configuration with a modular approach giving installers plenty of flexibility.

*Only applicable for Profile and Arctic range modules and faceplates.

*Only applicable for Profile and Arctic range modules and faceplates.

METALLIC

Designed for more demanding surroundings such as workshops, garages and light industrial units.

Hurricane 6™

Weather-resistant switches and sockets for even tougher environments, providing protection against dust and water ingress.

Our Ranges

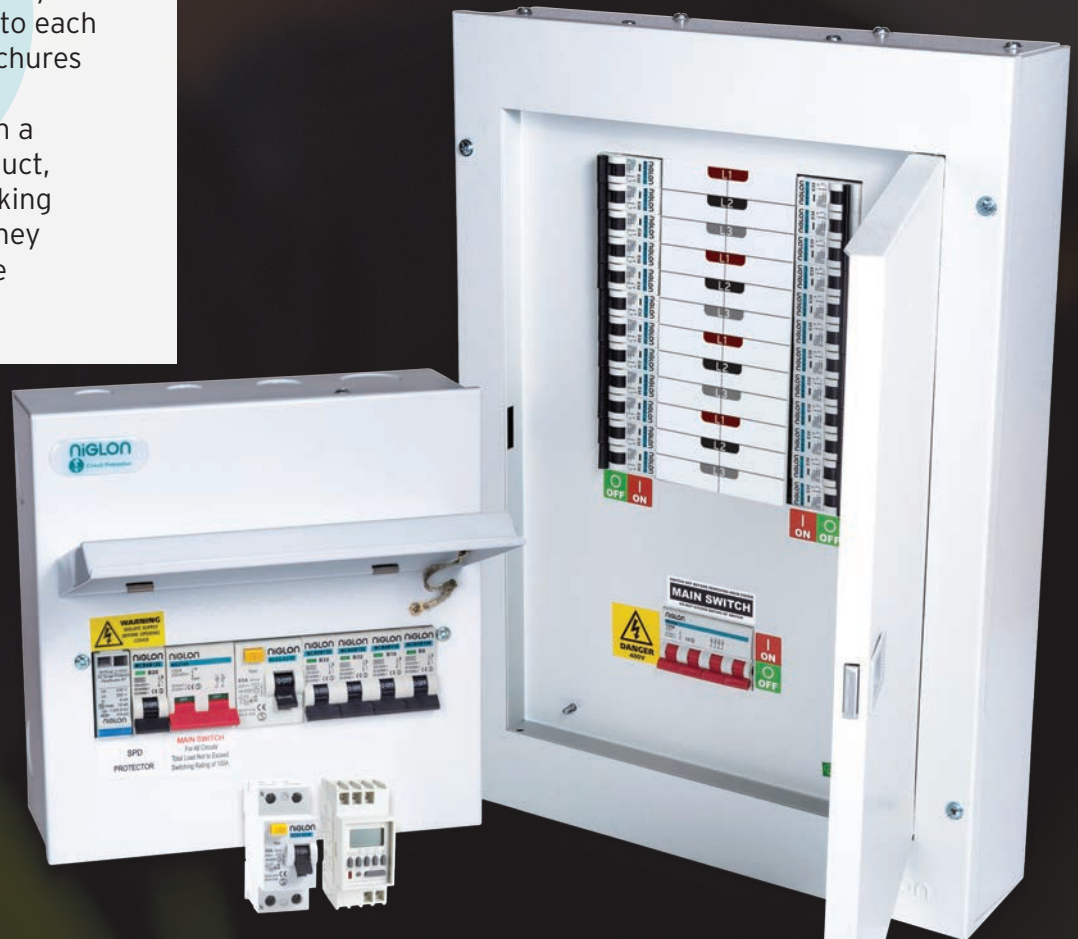

There are many factors which come into play when contractors and wholesalers are selecting products to use or stock - with functionality, aesthetics and cost all impacting the decision. But we firmly believe none of these should come at the expense of the quality and safety of the product itself.

In fact, we're so confident that we offer product guarantees of ten years on the Hurricane weatherproof range; 20 years on Euro Media, Matrix 20, Metallic, Ultima and both Premium Edge ranges; and an incredible 30 years on Median, Profile and Arctic products.

Circuit Protection

Safety cannot be compromised, ever. That's why we only stock circuit protection devices which have been thoroughly and independently tested to ensure they meet - or exceed - the latest guidelines. That's why we pride ourselves on our knowledge of the changing industry regulations. And that's why we clearly display certification credentials next to each applicable product in our brochures and online.

You can truly put your trust in a Niglon circuit protection product, to keep safe those living, working in and visiting the buildings they are installed within across the UK and beyond.

Our Ranges

We look at multiple aspects of a product before deciding to add it to our extensive catalogue: firstly, we need to know that it's safe, and that it's going to continue to be reliable for many years to come so that we can offer our impressive Niglon guarantee. But it's no use having a quality product if the look hasn't also been considered. Whether it's going to end up in a home, business, workshop, or hotel, we want every Niglon product to look fantastic within its setting.

Domestic

A complete range of domestic circuit protection which is independently SEMKO certified, all backed up with a 5 year product guarantee.

Commercial

3 Phase 125A 4-24 Way distribution boards and accessories come with a 5 year product guarantee and are independently certified by SEMKO.

Surge Protection

A comprehensive range of surge protection devices to protect against lightning strikes and over voltages. Tested and compliant with all the latest worldwide safety standards.

Industrial Accessories

The Niglon name and reputation has been built up over the decades and this allows us privileged access to several advanced European manufacturing facilities, so we can offer a vast range of well-designed and reliable products.

This is combined with our commitment to consistent research and development, meaning new products are continually brought to market - all with the same quality guarantee the industry has come to expect from Niglon. So it's no wonder that more and more customers are switching to us (and never switching back)

We know how important it is for installers to have quality products which they can rely on to complete any job. So we've put the same amount of care and attention into developing our industrial accessories ranges as all of our other products.

Plugs & Sockets

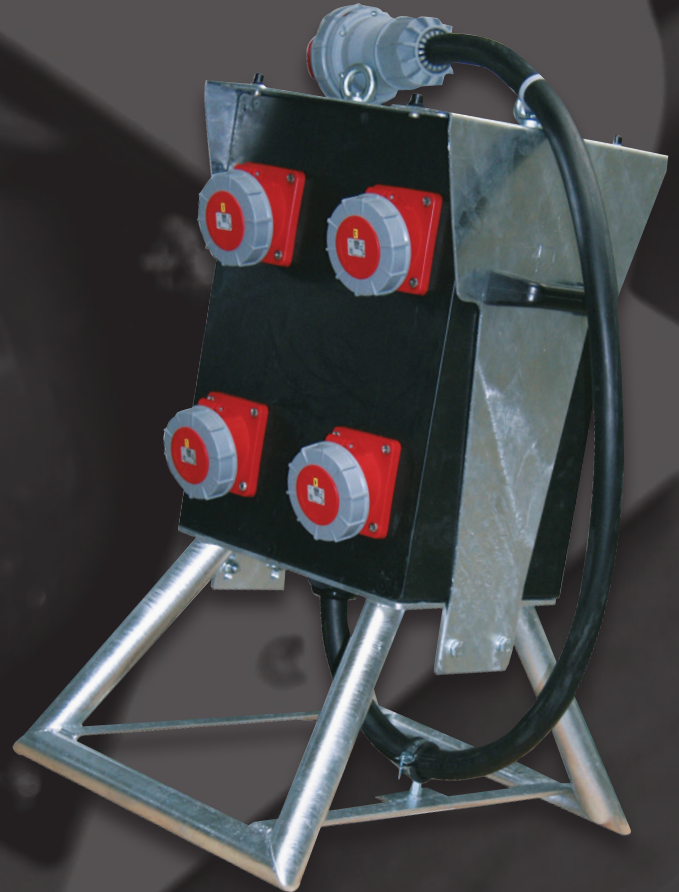

A comprehensive range of industrial plugs and sockets in three voltages with ratings from 16-125A all covered by a 2 year product guarantee.

Interlocking Outlets

Interlocking outlets increase safety by preventing the insertion and extraction of the plug when the power is on. Available in three voltages with ratings from 16-63A, all covered with a 2 year product guarantee.

Bespoke Service

Custom built power distribution boxes, in either solid rubber or thermoplastic enclosures.

Installation Essentials

Sourcing products from a variety of different suppliers costs time, money and effort. That's why the Niglon team has endeavoured to make it as easy as possible for their customers by stocking an impressive array of electrical essentials, all from one supplier.

Looking for cable reels, alarms, metal back boxes, push-fit connectors, or timers and thermostats? You're in luck, Niglon has all of this and more within their comprehensive essentials selection. And of course, all of the products are guaranteed to be the highest-quality because we simply won't stock anything other than the best.

Cable Management

An essential factor on any electrical installation, and that's why we scrutinise the quality, reliability and performance of every single product before adding it to our range of conduit boxes, fittings, cable glands, cable jointing and crimps, channel bracketry, flexible conduit, adaptable steel boxes, and IP68 cable connectors.

Fixings & Tools

Certain essentials are needed to get the job done, and that's why we are on hand with a selection of competitively-priced tools, drill bits, safety lock-out kits and other necessary components. Need safe-plates, fixing strips, roofing nuts and bolts or plastic spiral wrap? We have them all. Or perhaps it's brass nuts and washers, raised CSK brass screws, or cable ties you're after? We've got all of those too.

Lighting Control

Our popular everyday lighting control products are ideal for general commercial and amenity lighting requirements, with simple-to-install street lighting service cut-outs and isolators featuring a number of industry leading features.

Our stand-alone presence detectors, are equally as popular, having been designed to help reduce energy use and costs.

Control & Automation

Our control and automation collection features more than 700 products across five ranges. You'll find enclosures ranging from small plastic adaptable boxes to wall mounted steel; modern and easy-to-wire motor control gear; slimline and terminal relays; enclosed switchgear and panel components including pushbuttons and selector switches for most control applications.

And if that wasn't enough, we also have a bespoke service for those customers with specific requirements for their enclosures, or enclosed switchgear. We have several bespoke solutions which can help you achieve the perfect product for your needs - all you need to do is ask.

Bespoke Service

Striving For Success

Since moving into our purpose-built headquarters, conveniently placed in the heart of the country, we have invested heavily in the systems in place to manage and order stock, part of which has seen a significant increase in the amount of stock held at Niglon HQ.

We are one of the first suppliers in the UK to adopt these new systems, which are all aimed at providing a better, more accurate and faster service for our customers.

In the warehouse, lean management processes, high bay racking, advanced equipment and an investment in order picking and processing technology have all ensured that Niglon is more efficient and service driven than ever before. The company's operations are scalable to underpin continued service excellence and competitive pricing as we continue to grow.

Our Team

We've come a long way from our beginnings in 1943, when Stanley Douglas Hinley began working as a manufacturers' agent in Birmingham. The Niglon name was adopted in 1966, and Stanley's son, grandson and great-grandsons have all proudly made it their life's work to grow the business.

We've stayed true to our Midlands roots, moving a few times around the second city before finally settling in our purpose-built headquarters in Solihull in 2016.

The Niglon team offers brilliant service and hundreds of years of combined knowledge and expertise within the electrical sector.

Looking Ahead

We are committed to continually reviewing and extending our ranges, and we welcome feedback from all our customers. As a business we continue to invest in research and development to ensure our products meet the latest standards and that we are evolving our offering in-line with the very latest market demands.

Service is equally as important as our product design and we have proudly retained the ethos and levels of customer care you'd expect from a family-run company while growing our offering to truly compete with household names.

Online

On our website, you'll be able to access the latest versions of our general catalogue and control and automation catalogue, as well as comprehensive descriptions of the many and varied ranges we offer specification sheets and download product brochures.

We also share our company news, testimonials and industry updates on the website - or you can find out more about Niglon via our Facebook or LinkedIn pages

Marketing Support

We are proud to be part of the electrical industry and engage with wholesalers and contractors directly and through our fantastic relationships with the trade media. If you read respected electrical magazines and websites, you'll regularly see our featured content and our perspective on important issues such as testing and certification, with all PR supported by the expert communications agency we work alongside.

Our in-house design team is on hand to provide marketing support for our valued customers, from flyers, literature, web content and so much more...
