## Fixings & Tools

### NCF350 Cutting fluid

#### Technical Specifications

<b>Appearance</b>	Black Oil
<b>Contents</b>	Blend of organic oils, molybdenum disulphide, phosphorus, chlorine and sulphur
<b>Storage</b>	Store in a cool, dry place
<b>Flash Point</b>	250°C
<b>Temperature range</b>	Use at all metalworking temperatures
<b>Solubility:</b>	Insoluble in water

- Use for cutting, tapping, drilling, reaming, drawing, pressing, extruding and forming
- Contains molybdenum disulphide for reduced wear
- Improved surface finish
- Increased tool life
- Effective on stainless steel, titanium and soft materials such as copper and aluminium
- Reduces work hardening
- Reduces heat build up
